

Comport's SharePoint Maturity Model

Comport is expert at providing solutions. Expert at managing critical data so it is accessible, usable and secure. Expert at designing server and storage platforms for your content management needs. Expert at enterprise data protection, disaster recovery, high availability computing.

We build for success - solutions that clearly connect your business goals to the technical architecture.

Whether you need help scaling to the Enterprise level, or are planning a first SharePoint implementation, Comport's approach optimizes your investment in SharePoint.

A Powerful, Popular Platform

Ten years after SharePoint's first release, its wide-spread adoption serves to enhance collaboration and productivity. SharePoint is now a major enterprise application; many organizations have significant investments in SharePoint.

Today, companies look to maximize the impact of their investment, yet are faced with adoption, user satisfaction and deployment challenges on less than optimized infrastructures. Many organizations are using only a fraction of the platform's functionality; many want Enterprise-level implementations to boost their competitive positions.

Our SharePoint Maturity Model Assessment program will help you unlock the power of SharePoint to drive business impact and innovation.

Best Practices & Strategic Roadmap

The SharePoint Maturity Model was created to apply a holistic view to a SharePoint implementation, and to bring standardization around functionality, best practices and improvements.

Many experts have observed that although SharePoint implementations vary, there is a typical progression of implementation - upward through the functional area and then across the various functional areas. This progression forms the framework of the Model.

Comport's SharePoint Maturity Model provides a realistic assessment of your SharePoint implementation to determine where you are currently, as well as the level of SharePoint maturity that is best for your organization. We'll then work with you to develop a strategic roadmap and architecture to get there. You may be eligible for a no cost or reduced cost Assessment, please speak to your Comport sales executive.

SharePoint is an extensive, powerful platform. The Maturity Model Assessment helps business users and architects optimize the benefits of the platform.

Microsoft®
SharePoint® 2010

Solutions Offering

Description	Benefits
Half-Day Assessment Workshop with IT team to create a baseline benchmark and learn the Model. Map business needs to SharePoint capabilities.	Holistic view of the implementation with quantitative analysis and Benchmark. Deeper understanding of SharePoint platform
Full-Day Envisioning Session - Identify priorities, create high-level strategic roadmap, develop a foundational "Business Case", provide immersive technical capabilities experience	Enable planning & business case with priorities identified. Advance understanding of capabilities and design patterns.
2-4 Week Engagement - Create detailed strategic roadmap, prioritize solutions, assess physical environment, develop the architectural and technical design	Evolve the Roadmap into a prioritized plan for action and an architectural design
Identify projects to deliver and deploy SharePoint platform and related technologies - Create the Governance / Framework and/or Reference Architecture, and drive deployments.	Proven greater adoption, more satisfied users, a stable, optimized infrastructure, shift from maintenance to innovation, maximized return on investment
